HENNA AFTERCARE

Your outstanding Henna Brows need a little love to keep them looking gorgeous. Follow some simple steps to maintain your new look! –

- Don't get your brows wet for 24 hours.
- Do not use oil based cleansers, moisturizers or other creams on your brows – this may remove the Henna, change the colour of the Henna, or decrease its longevity.
- The Henna will continue to oxidise for up to 24 hours. During this time, the Henna may get a little darker.
- Henna usually lasts 2-3 weeks on the skin, and 4-6 weeks on the hair. If you have oily skin however, it may not last as long. This is normal and may improve with continued use of Henna.
- Henna can have a drying effect on the skin. If you are experiencing dryness, use a small amount of Argan oil or olive oil on the brows as a daily moisturizer.
- Do not use fake tan for at least 24 hours after having a Henna treatment. This can turn your brows green or yellow!
- If you wear sunscreen, use a physical barrier type like zinc cream or titanium dioxide, as chemical sunscreens accelerate Henna fading.
- Chlorine and salt water will fade the Henna faster than usual.

TINTING AFTERCARE

You've had an amazing tint, let's keep it looking swish! –

- Don't get your lashes/brows wet for 24 hours.
- You can wear mascara on tinted lashes, but doing so may reduce the longevity of the tint.
- Do not use oil based products on the area – it might remove your tint!
- Don't fake tan for at least 24 hours – it will turn your tint green (Ew.)
