### **LASH LIFT AFTERCARE**

Those peepers are poppin'! Want them to stay looking schmick for up to 8 weeks? Here's how –

- Don't get your lashes wet for 24 hours. They need time to set.
- Don't rub your lashes – this can damage the lift.
- Don't wear contact lenses for 24 hours after the treatment.
- Avoid swimming, saunas, steamy showers and sweating for 24 hours. After that, you're good to go!
- Don't wear eye makeup for 24 hours.
- Do not use an eyelash curler.
- Don't sleep on your face – you'll smooch your lashes!

Lashes may not achieve the amount of lift you were expecting, in which case, let me know, and we can modify your next lash lift.

Everyone's eyelash hair is different; some lashes may hold the curl longer, or less than others. As your lashes naturally fall out, the new hairs will grow back straight. Wearing mascara can help 're-lift' the lashes.
